***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Schlack et al. (US Patent # 5,392,447).

[Claim 1]

Schlack et al. teaches a method for recognizing a name card by a mobile phone (figures 1 and 21, col. 9 lines 41-45) having a camera (scanner unit 26), comprising the steps of: (a) a step in which an image of the name card taken photograph is inputted by the mobile phone having the camera (col. 8 lines 22-53); (b) a step in which the image of the name card is blocked in fields (See figures 6 and 16 how the information is blocked); (c) a step in which a menu for classifying the blocked fields (figure 14 shows a keyboard menu for inputting tag information) and the fields is displayed on a screen of the mobile phone having the camera (col. 9 line 63-col. 10 line 7, see figure 14 wherein a menu for classifying the fields is the keyboard and the fields is the data shown above); (d) a step in which a user select one of the fields using a cursor on the screen, and then select a menu or a shortcut key based on the selected field of the menu using a cursor, then a character in the selected fields based on the selected menu is recognized (col. 9 lines 46-62); (e) a step in which a method for recognizing a name card by a mobile phone having a camera including a storing of the recognized characters for future use (col. 9 lines 60-62).

[Claim 4]

Schlack teaches a method for recognizing a name card by a mobile phone having a camera is including to be blocked the image of the name card by a line (figure 6 teaches all the information is line wise).

[Claim 5]

Schlack teaches wherein in said step (a), a method for recognizing a name card by a mobile phone having a camera is including a close-up lens to be attached to the camera when a user take a photograph the image of the name card (figure 21, lens 90, col. 12 lines 16-37).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schlack et al. (US Patent # 5,392,447).

[Claim 2]

Schlack teaches wherein said the menu from step c, a method for recognizing a name card by a mobile phone having a camera is including a part of a name of the company, duty, name, home address, home telephone number, company telephone number, mobile phone number, (col. 9 lines 51-67). Schlack does not explicitly teach facsimile number, e-mail address, URL(Uniform Resource Locator), and department. However it would be a matter of design choice to include any one of the information as tag information.

[Claim 3]

Schlack teaches optical character recognition (Abstract) but fails to teach wherein said the menu from step (c), a method for recognizing a name card by a mobile phone having a camera is including a character recognition which is dependent on a language, if Korean name or English name in the menu is selected, the character recognition recognizes the selected character fields by Korean recognition or English recognition, which is built in the mobile phone having a camera, if a name, a name of the company, or duty of the menu is selected, it recognizes characters of the selected fields by Korean recognition, which is built in the mobile phone having a camera; if a home telephone number, a company telephone number, a mobile phone number, or a facsimile number of the menu is selected, it is recognized numeric of the selected fields by a numeric recognition, which is built in the mobile phone having a camera; if an e-mail address or URL of the menu is selected, it is recognized character of the selected fields by English recognition, which is built in the mobile phone having a camera . However Official Notice is taken that it is very well known to have a optical character recognition for different languages like Korean or English in order to be user-friendly. The information regarding a name, a name of the company, a home telephone number, a company telephone number, a mobile phone number, or a facsimile number an e-mail address or URL is explained in claim 2.
